SPECIAL LIST

NEW LOW PRICES ON TRANSPLANTED EVERGREENS—PREPAID FOR SHIPMENT AT PLANTING TIME, SPRING 1957

We are pleased to offer the following foundation and landscaping stock long as it lasts and suggest early ordering. The stock is all SUNCREST grown and is healthy, strong, well rooted material. Plant in garden rich soil, for fertilizer, use raw bone meal, 5-10-5 or well rotted manure all well mixed in the soil.

Pfitzer Juniper, one of the most popular dark green low spreading type, size 18-24 inches, each \$1.90—4 or more \$1.75; 10 to 15 inches, each \$1.10—4 or more \$1.00 each.

Hetzi Juniper, very similar to Pfitzer Juniper and grows faster. Bluish green in color. 10 to 15 inches, each \$1.10—4 or more \$1.00 each.

Andorra Juniper, low spreading variety seldom reach more than 15 inches in height. Green color in summer turning in fall after first frost to a very beautiful pinkish color. Very hardy and good grower. Popular for foundation, rock gardens and terrace landscaping. 8-12 inches, each \$1.10 — 4 or more \$1.00 each.

Juniper Scopulorum, upright, blue-green to silver tip, readily adapted to small areas, for corner foundation plantings and each side of door entrance where the situation may so permit upright species and varieties. 18-30 inches, \$1.50 each—4 or more \$1.25 each.

Taxus (Yew) Hicksi, the numerous branches ascend almost vertically, although it makes a main stem, the color is a rich dark, glossy green, and the habit is very narrow columnar. Size 8-14 inches, each \$1.25—4 or more \$1.10 each.

Taxus (Yew) Cuspidata, deep green, spreading type, graceful short branches covered a plump appearance of waxen foliage. Size 8-12 inches, each \$1.10—4 or more \$1.00 each.

Globe Arborvitae. A charming globe for the foreground—very popular for foundation groups and borders. The artistic flat lace like carved foliage of deep green forms a dense globe shape without trimming. 3 to 3½ ft. at maturity. Size 5 to 10 inches, each \$1.10—4 or more \$1.00 each.

American Arborvitae, upright, very popular for corner, foundation, hedges, landscape locations. Lace like carved foliage. Can be trimmed into compact specimens. Sizes 12 to 18 inches, each .50—4 or more 40c each.

Mugho Pine (Pinus Mughus) This is one of the most extensively-used dwarf Evergreen. It is a native of the extremely high mountain altitudes of Northern Europe. Its growth is compact, with numerous stems which extend out from the base of the tree and then ascends upward, making it more in the nature of a low bush. The candle-like new growth shoots after the first year from permanent transplanting on the matured specimens are a beautiful sight, the new growth should be cut back to about one inch after the second year from transplanting and can be maintained to a low compact size if sheared annually as stated. It has many uses in landscape work particularly in foundation groups, in rock gardens and in any location where a tree of great vitality and hardiness and dwarf form is needed. Highly recommended for soil erosion and terrace planting. Size 6 to 10 inches, each .30—4 or more .25 each.

~~**Douglas Fir**, Colorado seed origin, excellent Ornamental for lawn and road side planting. Usually a good green or blue-green, grows over a wide range of country except extreme southwest or coastal area and deep south. Size 16 to 24 inches, each .25—4 or more .20 each.~~

~~**Concolor White Fir**, excellent ornamental for lawn and road side planting, hardy and will withstand very low and high temperature. Bluish-Green, very popular and considered by many to compare with Taxus (Yew). Develops into beautiful specimen trees. Size 5 to 8 inches, each .30—4 or more .20 each.~~

~~**Balsam Fir**, Good Ornamental and excellent for Christmas trees. Color deep Blue-Green, narrow needles are about an inch long, and glossy on the upper side and light color on under side. Size 8 to 12 inches, .30 each—4 or more .20 each.~~

Colorado Blue Spruce, this species is very compact, straight stem. Stock grown from best seed source obtainable. A beautiful tree for landscape planting. Best for ornamental and Christmas trees. Size 10 to 16 inches, .30 each—4 or more .25 each.

Canadian Hemlock, highly popular for use as an ornamental. Flat needles, dark on upper side and silver green under side. Responds easily to shearing. Makes beautiful hedges and holds dark green during winter months. Extremely hardy. Size 6 to 12 inches, each .30—4 or more .25 each.

FOLLOWING ARE SEEDLINGS:

30 Evergreens ^{5.} \$6.00—Prepaid at planting time, Spring 1957. Choice stock, 3 year seedlings, 4 to 12 inches, 5 each Colorado Blue Spruce, Mugho Pine, Austrian Pine, American Red Pine, Scotch Pine and White Spruce.

Scotch Pine, French and Special Strains, highly recommended for the growing of Christmas trees. Best Fall and Winter holding color. Also Estate and Roadside Plantings. Size 4 to 6 inches, 100, \$8.00; 1000, \$35.00.

American Red Pine, recommended for Christmas trees and timber. Size 5 to 9 inches, 100, \$8.00; 1000, \$40.00.

Austrian Pine, for Christmas trees and Ornamentals. Sizes 6 to 10 inches, 100, \$10.00; 1000, \$45.00.

Mugho Pine, very slow and compact grower. Size 3 to 5 inches, 100, \$8.00; 1000, \$40.00.

Jack Pine (Banks) Will grow on extremely poor ground and over a wide area, except costal, deep south, south west. Much in demand for fast growing windbreaks, soil erosion. Size 4 to 8 inches, 100, \$5.00; 1000, \$30.00; Size 12 to 15 inches, 100, \$6.00.

Pitch Pine, will grow over a wide area and comparable to Jack Pine, much in demand for windbreaks, soil erosion and timber. Fast growing. Size 10 to 14 inches, 100, \$6.00.

Corsican Pine, Needle color dark green. Suitable for ornamental purposes. Fairly rapid grower. Size 8 to 12 inches, 100, \$12.50.

Griffithii Pine, Similar to White Pine. Broad Pyramidal tree, tall; rapid grower. Fairly resistant to cold and drought. Foilage Grayish green. Ornamental for yards and open places. Not suitable for planting around homes. Size 4 to 8 inches, 100, \$12.50.

Concolor White Fir (see under transplant description) Size 3 to 6 inches, 100, \$10.00.

Ponderosa Pine, color medium green, needles 4 to 5 inches. Will grow over a wide area, except in deep south. Will withstand high and low temperature. For windbreaks, road side, soil erosion, forestry. Size 8 to 12 inches, 100, \$15.00. Heavy grade, about pencil diameter.

Oriental Red Pine, medium to dark green foilage, characteristic to develop more than one leader, if main leader only is maintained after second year from transplanting this variety can be grown for Christmas trees, some trees develop cones at a very early age and the branches of these are in demand for Christmas greens. Much in demand for windbreaks, lawn and roadside planting. Hardy. Size 12 to 15 inches; \$8.00 per 100.

American Arborvitae (see description under transplants) Size 12 to 18 inches, \$10.00 per 100.

White Spruce, very compact, hardy, for Christmas trees and ornamentals. Size 6 to 12 inches, \$10.00 per 100 and \$55.00 per 1000.

Black Hills Spruce, compact growth. Size 3 to 6 inches, \$8.00 per 100; \$45.00 per 1000.

Norway Spruce, special strain, fast growing, dark green. Straight leader. One of the best for ornamentals and Christmas trees. Size 5 to 10 inches, \$8.00 per 100; and \$40.00 per 1000.

Engleman Blue Spruce, percentage of blue trees greater than Colorado Blue Spruce. Slow growing. More slender tree than Colorado Blue Spruce. Size 3 to 6 inches, \$8.00 per 100; \$50.00 per 1000.

Colorado Blue Spruce, (see description under transplants) Size 5 to 8 inches, \$8.00 per 100, and \$50.00 per 1000.

Multiflora Rose—Thorny upright type, used extensively as a barrier fence for livestock, hedges, screens, and will develop non climable fences. The rose is extremely colorful as it produces each year numerous white flowers and presents a beautiful picture about early June. Size (cut back to 5 to 10 inches) \$6.00 per 100; \$35.00 per 1000. Planting instructions included with shipping notice.
